Track	Web, Mobile, AI or GameDev	<select class="form-select" id="track" name="track" required> <option value="" disabled selected>Choose...</option> <option value="Web">Web</option> <option value="Mobile">Mobile</option> <option value="AI">AI</option><option value="GameDev">GameDev</option> </select>
Arrival day	20–22 November 2026	<input type="date" min="2026-11-20" max="2026-11-22">

Check-in time	09:00–18:00, every 30 minutes	<input type="time" min="09:00" max="18:00" step="1800" required>
Entry fee	0–5000 ₸, in steps of 500 ₸	<input type="number" min="0" max="5000" step="500" required placeholder="0 - 5000 ₸">
Experience level	one of three radio buttons	<input type="radio" id="expBeginner" value="Beginner" required> (cycle)
GitHub profile	optional, a full link	<input type="url" placeholder= "https://github.com/username">
Password	8–20 characters	<input type="password" minlength="8" maxlength="20" required>
Motivation	50–300 characters	<textarea rows="3" minlength="50" maxlength="300" required></textarea>
Rules agreement	checkbox	<button type="submit>

Task 3. Fix a bad form

Error	**Fix/Why**	**After**
Reserve	for button better to use HTML button tag	<button type="submit" class="btn btn-primary"> Reserve </button>
<input type="text" placeholder="Your name">	create suitable label	<label for="name" class="form-label"> Your name* </label> <input type="text" class="form-control" id="name" name="name" placeholder="Your Name" required>
<input type="text" placeholder="Email">	better placeholder, type email instead of text	<input type="email" class="form-control" id="email" name="email" placeholder="name@example.com" required>
<label>Phone</label>	css for label and add relation to input	<label for="phone" class="form-label"> Phone </label>
<input type="text" id="people">	number instead of text	<input type="number" class="form-control" id="guests" name="guests" min="1" max="10" value="2" required>
<input type="text" id="date" placeholder="dd/mm/yyyy">	instead of text use date type	<input type="date" class="form-control" id="date" name="date" required>
<input type="radio" name="inside" id="date">	Duplicated id="date"	<input class="form-check-input" type="radio" name="seating" id="seating-inside" value="Inside"

<input type="checkbox"> I agree to the terms </label>	add id name for checkbox	<input type="checkbox" class="form-check-input" id="terms" name="terms" required>
<select> <option> Lunch </option> <option> Dinner </option> </select>	add name id and css	<select class="form-select" id="meal" name="meal" required> <option value="" disabled selected>Select meal time...</option> <option value="Lunch">Lunch</option> <option value="Dinner">Dinner</option> </select>
<input type="radio" name="inside">	same name but diff id required	name="seating" id="seating-inside"

Conclusion

I learned how to work with input forms and validation of that.
