Assignment #5. JavaScript Basics

IT-2511 Mikhayevich Artur - Source Code - Pages

Task 1. Browser game (variables, operators, conditions)

Higher or Lower

Lives: 3 | Streak: 0 | Best Streak: 0

Current Number: 100

Make your choice!

Higher Lower

Task 2. A page built from data (arrays, loops, functions, DOM)

Search by tag...

To Do

Project Setup

Tag: setup | Priority: high

Start Work

Create Header

Tag: ui | Priority: medium

Start Work

Write API

Tag: backend | Priority: high

Start Work

Fix Cart Bug

Tag: bug | Priority: high

Start Work

Update Documentation

Tag: docs | Priority: low

Start Work

Write Tests

Tag: qa | Priority: medium

Start Work

In Progress (2/3)

Add Authentication

Tag: security | Priority: high

Complete

Connect Database

Tag: backend | Priority: high

Complete

Done

Design Footer

Tag: ui | Priority: low

Setup CI/CD

Tag: devops | Priority: medium

Task 3. Form with live validation (events, form validation)

Event: Select an event

Date: mm / dd / yyyy

Ticket Type: Select type

Quantity:

Full Name:

Email:

Promo Code (PROMO10 for 10% off):

Book Ticket

Ticket Preview

Event: -

Date: -

Name: -

Total: -

Field	Rule	Valid Example	Invalid Example
Full Name (fullName)	The value must consist of exactly two words (letters only) separated by a single space.	John Smith	John123 (or just John)
Date (date)	The date must be in the future and not be included in the predefined array of sold-out days (soldOutDates).	2027-05-15	2026-11-01 (Sold out date)

Quantity (quantity)	The number cannot exceed the available seats linked to the selected ticket type (VIP = 5, Standard = 20).	3 (when VIP is selected)	10 (when VIP is selected)
Promo Code (promo)	The field is optional, but if entered, the text must strictly match the string PROMO10.	PROMO10	SALE20

Conclusion

I learned how to wrok with JScript.
