

Part 1. Project setup and home page

Task 1. Create a basic webpage on a topic of your choice. (10 points)

Created the folder structure: index.html, about.html, contact.html, css/style.css, an images folder and a media folder.

Wrote a valid HTML boilerplate in every page (with lang, charset and the viewport meta).

Created css/style.css

Divided index.html into header, nav, main and footer.

Serega Pirat academy

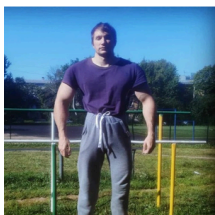

Talent major

The Seregi Pirata Academy offers the world's first bachelor's degree program in talent major. Academia is focused on building a sustainable community, teaching students a range of skills for managing their personal lives, and creating content

Key Milestones

1. Starts Dota.
2. Released first music tracks.
3. Reach thousand of followers.
4. Released own meme.

Key skills

Play Dota 2.
Streaming.
Content creation.
Creating own "meta".
© Kaifonavt. No rights reserved. Nothing ever happens.

Inside main put one h1, two h2 sections with my own text, one unordered and one ordered list, and two images (from the images folder) with meaningful alt text.

Part 2. Advanced HTML

Task 2. About page, media and navigation (20 points)

About Serega Pirat

Serega Pirat is a well-known Internet personality, streamer, and musician. He started creating content based on the game Dota 2 and later moved away from that image. His association with this game alone is a very important element of modern Russian meme culture.

Key Milestones

2018: Starts his official streaming activity focusing on Dota 2 gameplay.

2020: Released his first viral music tracks that expanded his audience.

2022: Reached major growth milestones across Twitch and YouTube with hundreds of thousands of followers.

2023: Released popular music singles and music videos that racked up millions of views.

Key Facts

Known for playing and streaming Dota 2.

Produces his own music tracks alongside streaming.

Pioneer of YouTube creative communities.

Frequently collaborates with other gaming creators and meme culture personalities.

Photo

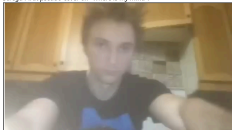

Serega Pirat.

Quote

"Mom says I'm a special boy."
— Serega Pirat in song "on the moon"

Highlight

Serega Pirat pseudo-cover on "Where is my mind".

Build about.html about one thing from my topic: a person, a place, a product or a track.

A heading and a paragraph of 3-5 sentences about my subject.

An ordered list of 4-6 key dates and an unordered list of at least 4 facts.

A figure with a photo and a figcaption (descriptive alt text on the image).

A blockquote with the source written under it, and word marked with strong

One embedded multimedia element that fits my topic: audio, video or an iframe with a short label.

An external link that opens in a new tab (target="_blank" rel="noopener").

```
<header class="site-header">
  <div class="nav-container">
    <a href="index.html" class="brand-logo">Serega Pirat Academy</a>
    <nav class="main-nav" aria-label="Main Navigation">
      <ul class="nav-list">
        <li><a href="index.html" class="nav-link">Home</a></li>
        <li><a href="about.html" class="nav-link active" aria-current="page">About</a></li>
        <li><a href="contact.html" class="nav-link">Contact</a></li>
      </ul>
    </nav>
  </div>
</header>
```

Navigation bar. Made one navbar with links to all my pages.

Put the same navbar in the header of every page and check that every link works.

Mark the current page (for example an active class).

Task 3. Data table and contact form (20 points)

Data table. Made a table with real data about my topic: a price list, a timetable, a comparison, a schedule or a discography.

At least 4 columns and 5 rows of real data.

Use caption, thead, tbody and tfoot.

Use th for header cells and add scope to each of them.

Join at least two cells with colspan or rowspan where it makes sense.

Course Schedule & Fee Overview

Academic Course Schedule and Registration Rates (2026/2027)

Course Code	Course Name	Schedule Day & Time	Standard Fee (USD)
TS-101	Introduction to Talent Science	Mon / Wed 09:00 - 10:30	\$450
DBC-201	Build Development Fundamentals	Tue / Thu 11:00 - 12:30	\$500
MS-301	Music Structures & Spotify Algorithms	Mon / Wed 14:00 - 15:30	\$550
ST-102	Streaming	Friday 10:00 - 13:00	\$480
PROJ-400	Senior Capstone Project - Part A	Tuesday 15:00 - 17:00	\$900 (Full Year Bundle)
	Senior Capstone Project - Part B	Thursday 15:00 - 17:00	
Average Course Fee			\$576

Contact form. Build a functional HTML form in contact.html (no backend is needed, the form does not have to send data).

Wrap the fields in a fieldset with a legend.

Every field has a label connected to its input with matching for and id.

At least five different input types (for example text, email, number, date, color, checkbox, radio, textarea) plus a submit button.

Used required on at least two fields and one more native validation attribute (placeholder, min/max, maxlength or pattern).

Group related radio buttons with the same name

Contact Us

Contact & Inquiry Details

        <span class="label-heading">Preferred Contact Method:</span>
        <div class="radio-group">
          <input type="radio" id="pref-email" name="contactPref" value="email" checked>
          <label for="pref-email">Email</label>
          <input type="radio" id="pref-phone" name="contactPref" value="phone">
          <label for="pref-phone">Phone</label>
        </div>
      </div>
      <div class="form-group">
        <label for="user-message">Your Message:</label>
        <textarea id="user-message" name="userMessage" rows="5" placeholder="Write your message here..."></textarea>
      </div>
      <div class="form-group checkbox-group">
        <input type="checkbox" id="subscribe-news" name="subscribeNews" value="yes">
        <label for="subscribe-news">Subscribe to newsletter updates</label>
      </div>
      <div class="form-group">
        <button type="submit" id="submit-btn" class="btn-submit">Send Message</button>
      </div>
    </fieldset>
  </form>
</section>
```

Part 3. CSS styling

Task 4. CSS styling (10 points)

Link `css/style.css` to all pages and style them from this single external stylesheet. No style blocks and no inline style attributes.

Choose 3-4 colors and write them in at least three formats (name, hex, rgb or hsl).

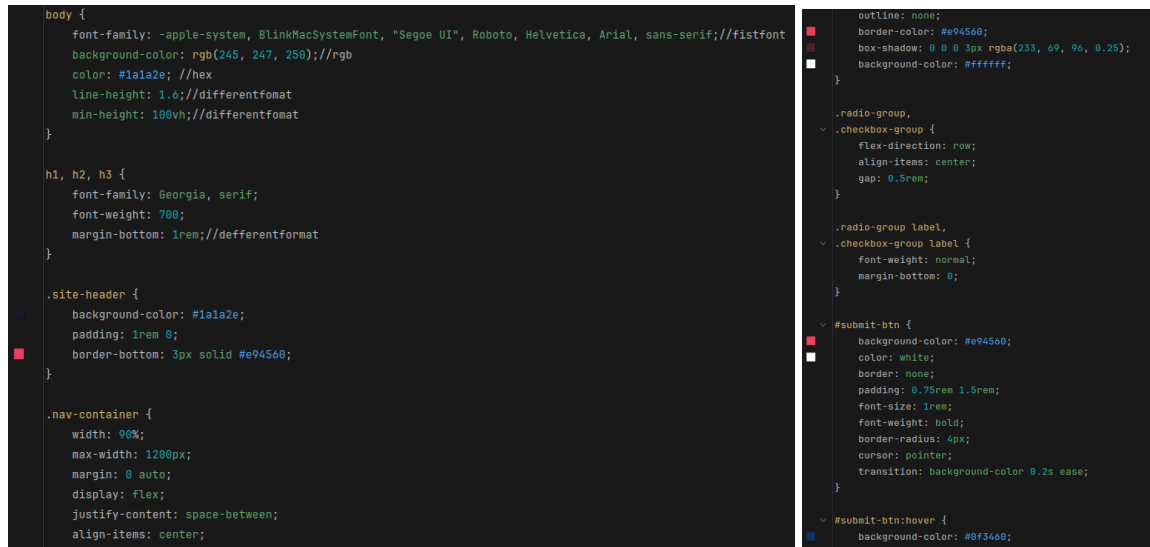

Choose fonts and set sizes, weights and alignment (maximum two font families).

Use margin, padding and border so you can see the box model in the developer tools.

Use element, class and ID selectors. Use the ID only for one unique element.

Style the navigation (no underline, good spacing, a hover effect that changes more than the color), the table (readable rows) and the form (a visible `:focus` state).

Use at least three CSS units (px, %, rem, em, vh)

Task 5. Validate and publish (5 points)

Validate every HTML page with the W3C Markup Validator (https://validator.w3.org/#validate_by_input) and the stylesheet with the W3C CSS Validator (https://jigsaw.w3.org/css-validator/#validate_by_input); fix the errors and put the clean-result screenshots in your report.

Publish the site on [GitHub](#) Pages with [index.html](#) as the entry page.
